School District Reorganization

The number of school districts in Wisconsin has changed significantly over the last century. In the early 1920's, there were more than 7,000 school districts in the state, the majority of which operated one-room rural schools. At that time, property tax was the primary source of funding for school operations. Legal changes over the years, primarily in how school districts are funded, have caused the number of districts to decrease.

In 1927, state aid was first provided to school districts distributed on the basis of the taxable wealth and number of elementary teachers employed in each district. Over the next two decades, there was little change in the number of districts in the state. In 1947, the Commission on Improvement of the Educational System was created to study the state's educational system and make recommendations to the Legislature regarding the state's role in funding schools. The Commission recommended the first major changes to the equalization law. In 1949, several of the Commission's recommendations were enacted, including that aid vary based on district organization and program expansion or improvement. Under these provisions, districts were classified as either basic, integrated, or Class A. District levels were determined by meeting certain requirements, with higher levels receiving more state support. Additionally, aid was determined on a per pupil basis rather than by the number of elementary teachers, with high school pupils receiving more aid. By the following year, the number of school districts had decreased to approximately 4,500.

The next major change, which occurred in 1959, required all territory within the state to be included in a school district that operated a high school by July 1, 1962, and provided greater state support for districts offering grades K-12 or 1-12

over separate union high school (UHS) and elementary districts. This brought the number of districts in the state to 843 by 1962-63, including 56 UHS districts and 448 elementary districts located within their boundaries. The number of UHS and elementary districts continued to steadily decrease over the next several years until 1979-80, when there were a total of 433 districts in the state, including 10 UHS and 50 elementary districts. Of the 421 school districts currently in the state, there are 10 UHS and 43 elementary or K-8 districts.

In recent years, interest has grown in public school district reorganization options, including consolidation, creation, dissolution, and the transfer of territory. In general, statutory provisions allow for reorganization by any of these methods for any school district except Milwaukee Public Schools. This paper describes the provisions of Chapter 117 of the statutes, including the procedures that govern major school district reorganization, and the general school aid and revenue limit adjustments applicable to reorganized districts. In addition, the School District Boundary Appeal Board and evaluation criteria for school district reorganizations are discussed.

School District Boundary Appeal Board

The School District Boundary Appeal Board (SDBAB) is an attached board in the Department of Public Instruction (DPI). The Board consists of 12 school board members appointed by the State Superintendent of Public Instruction for staggered two-year terms and the State Superintendent or designee, who serves as the chairperson of the Board. Four Board members must be school board members of school districts with small enrollments, four must be school board members of school districts with medium enrollments, and four must be school board members of school

districts with large enrollments. No two Board members may reside within the boundaries of the same cooperative educational service agency. Small, medium, and large school districts are defined by rule as the bottom, middle, and top thirds of school districts when placed in order of enrollment.

The State Superintendent appoints three members of the Board to hear appeals filed regarding the detachment and attachment of territory, one each from small, medium, and large school districts. For other types of reviews, the State Superintendent appoints seven members, including the State Superintendent or his or her designee, and two members each from small, medium, and large districts. Any action of the Board requires the affirmative vote of four of the seven members appointed.

School District Consolidation

School district consolidation may be initiated by the adoption of resolutions by two or more school boards stating that they will consider consolidating their school districts. The school district clerk of each school board adopting such a resolution must send a certified copy of the resolution to the school boards of each of the other affected school districts and to the Secretary of the SDBAB. If the school boards do not specify an alternative timeline as described below, the following timeline and procedures apply.

In the first July following adoption of the resolutions to consider consolidation, the affected school boards may order the school districts consolidated by adopting resolutions ordering the consolidation. A consolidation may occur only if all of the affected school boards agree to consolidate by August 1. The school district clerk of each school board must, within five days after the adoption of a resolution either ordering or denying a consolidation, send a certified copy of the resolution to the school boards of each of the other

affected school districts and file a certified copy of the resolution with the SDBAB. If the resolution approves reorganization, within five days after receipt of the resolution, the Secretary of the SDBAB must send a certified copy to the clerk of each city, village, town or county, any part of which is contained within an affected school district.

If the school board of each affected school district adopts a resolution ordering the consolidation, the consolidation takes effect on the next July 1, unless a referendum is required. If the affected school boards agree to consolidate, a referendum must be held if a petition requesting a referendum is filed before the second Tuesday of September. The petition must be signed by at least 10% of the electors who reside in any affected school district and must be filed with the clerk of the school district that has the highest equalized valuation of the affected school districts. Alternatively, a referendum must be held if, at the time of adopting a resolution ordering the consolidation, the school board of any affected school district directs the holding of a referendum. The results of the referendum vote are binding, and the referendum must pass in each affected school district for the consolidation to occur. The consolidation referendum is held on the Tuesday following the first Monday in November. If the consolidation is approved, then the school districts are consolidated as of the next July 1.

Alternative Timelines. Under 2009 Act 307, two alternative timelines were established, either of which a school board may elect to follow by specifying their chosen timeline in the resolution to consider consolidation.

Under the first alternative, the resolutions ordering or denying a consolidation must be adopted in the first December beginning after the adoption of resolutions by two or more school boards that they will consider consolidating their districts. Failure of a board to order or deny a consolidation

before January 1 constitutes denial of the consolidation by that board.

The petition requesting a referendum must be filed before the second Tuesday in February under this timeline, and if a referendum is required it must be held on the first Tuesday in April. If a majority of referendum voters in each affected school district are in favor of consolidation, the school districts are consolidated on the second following July 1.

Under the second alternative timeline, the resolutions ordering or denying a consolidation must be adopted in the first May beginning after the adoption of resolutions by two or more school boards stating that they will consider consolidating their school districts. Failure of a school board to adopt a resolution either ordering or denying the consolidation before June 1 constitutes a denial of the consolidation by that school board. A petition requesting a referendum on the consolidation must be filed before the second Tuesday of July following adoption of the resolutions ordering consolidation. If a referendum is required, it must be held on the second Tuesday of September following receipt of the petition or adoption of the resolution. If a majority of referendum voters in each affected school district are in favor of consolidation, the school districts are consolidated on the following July 1.

Consolidation of Union High and Elementary School Districts. The school boards of a union high school district and any school districts operating only elementary grades whose territory is included in the union high school district may adopt resolutions stating that they will consider consolidating the union high school district and all of the elementary school districts whose territory is included in the union high school district to create a common or unified school district operating both elementary and high school grades. After the adoption of a resolution, the school district clerk of each school board must send a certified copy of

the resolution to the school boards of each of the other affected school districts and to the Secretary of the SDBAB.

The school board of the union high school district and the school boards of one or more of the elementary school districts that adopted resolutions and that have, in their combined territory, at least 55% of the equalized valuation of the union high school district, may order the districts consolidated to create a common or unified school district by adopting a resolution ordering consolidation. If the school boards fail to adopt a resolution by the following August 1, the proposal will be considered to be denied. If a consolidation is ordered, it will take effect on the following July 1, unless a referendum is required. A referendum may be held under the same conditions as for other types of consolidation.

If an elementary school district has territory in more than one union high school district, statutes only permit it to consolidate into a common or unified school district with the union high school district in which more than 50% of its territory resides, as measured by equalized valuation. Only the territory of the elementary school district that is located within the union high school district is included in the newly created common or unified school district. The remaining elementary school district territory is attached to a school district that operates only elementary grades and has territory located in the union high school district attended by the high school pupils who reside in the territory being attached. Upon the request of the school board of any affected district, the SDBAB will determine to which elementary school district the territory should be attached, as well as the apportionment of assets and liabilities between the districts.

Consolidated Districts. On the effective consolidation date of two or more districts, the school districts that were consolidated cease to exist. Title to all property and the assets of the school districts become vested in the new consolidated

district. Claims, obligations, and contracts of the school districts become claims, obligations, and contracts of the new consolidated school district. Employees of the school districts become employees of the new consolidated district. The new consolidated district assumes the rights and obligations of the consolidating districts under the provisions of any collective bargaining agreement that applies to these employees. The collective bargaining agreement remains in effect until the expiration date of the agreement or until a new collective bargaining agreement between the school district and representatives of these employees is effective, whichever occurs first. A written agreement between two or more school districts considering consolidation to continue to operate a program or facility at a specific location for a specified period after consolidation, not to exceed five years, is binding on the new joint interim school board or elected school board.

The school boards of the consolidating school districts make up the joint interim school board of the new school district. The joint interim school board begins its duties, if no referendum is required, on the second Tuesday of September following the adoption of the resolution to consolidate, or, if a referendum is required, on the 31st day following the date on which the order of reorganization is filed.

Under the alternative timelines established under Act 307, the joint interim school board begins its duties, if no referendum is required, on either the second Tuesday of February under the first alternative, or the second Tuesday of July under the second alternative, following a school board's adoption of a consolidation resolution.

The joint interim board has all of the powers and duties of a school board elected for the school district and performs those duties until a new school board is elected. The date of the next election is set in the resolution to consolidate, usually within four months after the consolidation effective date. Any action of the joint interim school

board requires an affirmative vote of a majority of a quorum of the joint interim board.

Any person aggrieved by the denial of the consolidation by the school boards may appeal the decision to a circuit court. To begin the appeal, the aggrieved person must serve written notice, specifically stating the grounds for the appeal, upon the Secretary of the SDBAB and file the notice with the clerk of circuit court of any county in which any territory of any affected school district is located. The appeal must be initiated within 30 days after copies of the school boards' decisions are filed with the Secretary of the SDBAB.

Recent School District Consolidation. School district consolidation, while relatively rare, has become more common in recent years as more districts have studied their options for reorganization. The recent consolidations began with two K-8 school districts (the Trevor School District and the Wilmot School District). In November, 2005, voters in each of these districts approved a referendum for consolidation, and the consolidated Trevor Wilmot School District took effect in the 2006-07 school year.

In July, 2008, the school boards of the Park Falls School District and the Glidden School District voted to consolidate to form the Chequamegon School District, beginning in the 2009-10 school year. This consolidation was approved by voters in each of the school districts.

The Chetek and Weyerhaeuser school district boards voted to consolidate in June, 2009, and the consolidation was approved by voters in each of the districts in November, 2009. The consolidation and formation of the Chetek-Weyerhaeuser School District took effect on July 1, 2010.

The school boards of three K-8 districts (Herman #22, Neosho J3, and Rubicon J6) voted in July, 2015, to consolidate into one district, called the Herman-Neosho-Rubicon School District. The

consolidation became effective on July 1, 2016.

The school boards of Friess Lake and Richfield J1, both K-8 districts, voted in July, 2017, to consolidate into a new district, Holy Hill Area School District. The consolidation became effective on July 1, 2018. Because of this consolidation, the number of school districts in the state was reduced from 422 to 421.

Consolidation Aid Adjustments. In the school year in which a school district consolidation takes effect and in each of the subsequent four school years, the consolidated school district's state general school aids cannot be less than the total aggregate state general school aids received by the consolidating school districts in the school year prior to the consolidation. The statutes specify that these additional aid payments are to be paid from the general equalization aids appropriation.

Additionally, in computing general equalization aid for districts that consolidate prior to July 1, 2019, in the school year in which the consolidation takes effect and in each of the subsequent four school years, the primary and secondary ceiling cost amounts for shared costs are multiplied by 1.15 and rounded to the next lowest dollar. The same is true for a consolidated district's primary, secondary, and tertiary guaranteed valuations per member. Any additional state aid generated by these provisions for a consolidated district is outside of revenue limits. In the sixth year after the consolidation, the consolidated district receives a recurring revenue limit adjustment equal to 75% of the aid that is outside of revenue limits received by the district in the previous year.

For districts that consolidate on or after July 1, 2019, aid is provided in the form of a categorical aid equal to \$150 per pupil attending school in the consolidated district in the school year in which the consolidation takes place and each of the subsequent four school years. In the sixth year following the year in which the consolidation takes effect, the

consolidated district receives 50% of the amount received in the fifth year after the consolidation. In the seventh year following the year in which the consolidation takes effect, the district qualifies for 25% of the amount received in the fifth year after the consolidation. A district's current three-year rolling average pupil count under revenue limits is used to calculate the aid payment.

Additionally, for districts that consolidate on or after July 1, 2019, in the school year in which a school district consolidation takes place and each of the subsequent four school years, the consolidated district receives sparsity aid (\$400 per pupil) equal to not less than 50% of the aggregate amount of sparsity aid received by the consolidating school districts in the school year prior to the year in which the consolidation takes effect.

School District Creation

Under current law, a school district can be created out of a portion or portions of the territory of one or more existing districts. The reorganization to create a new school district may be initiated before July 1 of any year by the adoption of resolutions to consider creating the new district by the school boards of all of the school districts containing territory within the proposed district. Alternatively, a written petition may be filed with the clerk of the district that has the highest equalized valuation of the affected districts. The petition must be signed by electors who total: (a) at least 20% of the total number of electors residing in the affected school districts; and (b) at least 5% of the electors residing in each affected district. In either case, the petition or resolution must include the approximate boundaries of the proposed district. Before agreeing on the precise boundaries of the new school district and the allocation of assets and liabilities, each affected school board must hold a public hearing, or joint school board hearings, on the reorganization.

Before October 15, the school boards of a majority of the affected school districts may, by

adoption of a resolution, agree on the precise boundaries and the allocation of assets and liabilities between the affected school districts and the proposed school district. When territory is transferred from one school district to another, each district involved must be assigned assets and liabilities based on the proportion of the equalized valuation of all taxable property in the territory transferred to the equalized valuation of all taxable property of the school district from which territory is taken.

The affected school boards may, by resolution, establish an alternative method of asset and liability apportionment if the boards find that it is necessary to provide a more equitable method than is described above. If the school boards of a majority of the affected school districts fail to agree on the precise boundaries or on the apportionment of assets and liabilities by October 15, the SDBAB will do so by the following February 15. Neither the school boards nor the SDBAB may detach territory from any additional district.

If, by October 15, the affected districts agree on precise boundaries and the apportionment of assets and liabilities, each affected school board has until January 15 to adopt a resolution ordering or denying the creation of the school district. If, by October 15, the affected districts do not agree on precise boundaries and the apportionment of assets and liabilities and the SDBAB makes the determination, each affected school board has until April 15 to adopt a resolution ordering or denying the creation of the school district.

In both cases, the resolution must state the school board's rationale for ordering or denying the reorganization and include an evaluation of the criteria specified in law. If a school board fails to adopt a resolution either ordering or denying the creation of the school district before the applicable date, it is considered a denial of the creation of the school district by that school board. Within five days of the resolution either ordering or denying the reorganization, the school district clerk of each

school board must send a certified copy of the resolution to the school boards of each of the other affected districts and file a certified copy of the resolution.

If any one of the affected school boards denies the reorganization and no petition for SDBAB review is filed, then the process ends and there is no reorganization. If all of the affected school boards grant the reorganization and no petition for SDBAB review is filed, then a referendum is held.

The SDBAB must review a proposed reorganization if: (a) all of the affected school districts grant the reorganization and a petition for SDBAB review, signed by at least 10% of the number of electors residing in the territory of the affected school districts that is not within the proposed school district, is filed; or (b) any of the affected school districts deny the reorganization and a petition for SDBAB review, signed by at least 10% of the number of electors residing in each affected school district, is filed.

The petition for SDBAB review must be filed by February 15, if the districts originally agreed on the precise boundaries and assets and liabilities, or by May 15, if the Board determined the precise boundaries and assets and liabilities. Upon receipt of a petition for review, the SDBAB must hold a public hearing on the proposed reorganization. After the hearing and after consulting with the school boards of the affected school districts, but before May 15, the SDBAB may modify the boundaries and the apportionment of assets and liabilities. (If the SDBAB originally drew the boundaries and made the allocation of assets and liabilities, the SDBAB may not modify their original plan.) The SDBAB may not detach territory from any additional school districts if it modifies the boundaries. If the SDBAB modifies the boundaries or the apportionment of assets and liabilities at this point, each affected school board, before June 15, may issue an order to grant or deny the proposed reorganization, as modified by the Board.

If another petition for SDBAB review is not filed at this point, the SDBAB can proceed to issue an order granting or denying the proposed reorganization, but not before June 21. By August 1, the SDBAB must issue its order either granting or denying the proposed reorganization. The order must state the Board's rationale and include an evaluation of the statutory criteria. The SDBAB may overturn the decision of the local school boards only if it finds that the local school boards' conclusions regarding the criteria are not supported by the facts or that the local school boards did not properly apply these factors. If the SDBAB does not grant the reorganization, there is no reorganization. If the SDBAB grants the reorganization, then a referendum is held.

If the reorganization is granted by the affected school boards or the SDBAB, before the reorganization may take effect, it must also be approved in a referendum by electors residing in the territory of the proposed new school district. A referendum is held in the territory of the school district proposed to be created by the reorganization in any of the following circumstances: (a) the school boards of all of the affected districts grant the proposed reorganization, and there is no petition for SDBAB review; (b) the school boards of all of the affected districts grant the proposed reorganization, a petition for SDBAB review is filed, and the SDBAB grants the proposed reorganization; or (c) the school board of one or more of the affected school districts denies the proposed reorganization, a petition for SDBAB review is filed, and the Board grants the reorganization.

A second referendum on the proposed reorganization may be held in the territory of the affected school districts (the entire territory of all of the school districts from which territory will be detached to create the new district) at the same time as the first referendum if: (a) the school board of one or more of the affected school districts denies the proposed reorganization, a petition for SDBAB review is filed, and the SDBAB grants the reorganization; and (b) a petition requesting a

referendum, signed by at least 20% of the number of electors residing in the territory of the affected school districts, is filed with the district with the largest equalized valuation before the second Tuesday of September.

If voters approve the reorganization in the first referendum from above, if only one referendum is required, or in both referenda if two are required, the school boards of the affected districts must make and file an order of school district reorganization with the Secretary of the SDBAB. The reorganization takes effect on the following July 1 unless the school board of the newly created school district adopts and files a resolution stating that the reorganization takes effect on the second July 1 following the order of reorganization.

Within 30 days after copies of any order from the SDBAB are filed with the Secretary of the SDBAB, an appeal may be filed. The appeal is filed with circuit court of any county in which any of the territory proposed to be detached from, or included in, another school district is located or with the circuit court of any county in which any territory proposed to be attached, or the school district that is proposed to be created, is located.

The first election of school board members in a newly-created school district is held at the spring election following the referendum. School board members elected to a school board in an election in a newly-created district must reside in the territory of the new school district. Any person elected to the school board in a newly-created school district who is also a member of the school board of an affected school district is not eligible to serve unless the person resigns as a member of the other school board.

Any employee of a school district from which territory is detached by the reorganization who is laid off as a result of the reorganization has priority over other persons for three years for new or vacant positions for which he or she is qualified in the newly-created school district. Any person who

wishes to exercise his or her priority must notify the school district that is created by the reorganization, in writing, that he or she wishes to be considered for any new or vacant position.

Alternative Timeline. An alternative timeline was established under 2017 Act 59 that would apply only to a school district meeting the following criteria: (a) meets the criteria for the creation of an opportunity schools partnership program (OSPP); (b) contains a city that has a population of more than 75,000; and (c) contains at least two villages. (To qualify for the creation of an OSPP, a district must meet the following criteria: (a) was assigned to the lowest performance category on the two most recent school district accountability reports; (b) has a pupil membership of over 15,000; and (c) received intradistrict transfer aid in the two schools years in which the district was assigned the lowest performance category on the school district accountability reports.) At the time of budget deliberations it was anticipated that this provision could apply to Racine Unified School District in 2017-18; however, no school districts were eligible to use this alternative timeline in the 2017-18 through 2024-25 school years.

Recent School District Creation. There has been one school district created under these provisions in recent years, although there have been discussions of potential new districts in several areas of the state. After a series of actions by the school board of the Shawano-Gresham School District in conformance with the statutes governing school district creation, voters approved a referendum on the question of creating the Gresham School District in November, 2006. The new school district began operations in the 2007-08 school year, and there now are separate Shawano and Gresham school districts.

Revenue Limit--Newly-Created Districts. For a newly-created district, the revenue limit for its first year of operation is based on the weighted average of prior year revenues per pupil of the school districts from which territory was detached to

create the new district, plus the allowable revenue increase for the current year, if any. The computation is as follows: (a) for each of the existing school districts, multiply its prior year per-pupil revenue by the number of pupils enrolled in that district during the prior year who resided in territory that was detached from that district to create the new district; (b) sum the amounts determined in (a), and divide that sum by the total number of pupils residing in the detached territory who were enrolled in the prior year in a school district from which the territory was detached; (c) add the allowable per-pupil revenue increase, if any; (d) multiply the amount in (c) by the greater of: (1) the total number of pupils residing in the detached territory who were enrolled in the prior year in the school district from which the territory was detached; or (2) the number of pupils enrolled in the new school district as determined by its third Friday in September pupil count for the current school year.

Thereafter, the revenue limit for the new school district is computed as for other school districts, with the exception of the membership used in the computation. In the first school year starting after the school year beginning with the effective date of the reorganization, the base year per-pupil amount is calculated using the prior year number of pupils, and the amount of revenue available to the school district is calculated using the average number of pupils in the current and prior year. In the second year starting after the school year beginning with the effective date of the reorganization, the base year per-pupil amount is calculated using the average number of pupils in the two prior years, and the amount of revenue available to the school district is calculated using the average number of pupils in the current and prior two years. In the third year, the new school district would have three years of pupil counts available, and the three-year rolling average calculation is used.

Aid Adjustments--Existing Districts. Each school district from which territory is detached to

create a school district has its revenue limit increased in the year that the reorganization takes effect by 5% of its general school aid. For a school district from which territory was detached to create a school district, in each of the three years beginning on the July 1 following the effective date of the reorganization: (a) the primary and secondary cost ceilings are multiplied by 1.05 and rounded to the next lower dollar; and (b) the primary, secondary, and tertiary guarantees are multiplied by 1.05 and rounded to the next lower dollar. The additional aid generated by these adjustments is excluded from the calculation of revenue limits.

Revenue Limits -- Existing Districts. To determine revenue limits, the prior year's revenue per pupil is determined in the school year beginning with the effective date of the reorganization for each school district from which territory is detached to create a new school district. Then, the per pupil adjustment under revenue limits, if any, is added to that per pupil amount. Finally, this per pupil amount is multiplied by the greater of: (a) the number of pupils who in the previous school year were enrolled in the school district and who did not reside in the detached territory; or (b) the number of pupils enrolled in the school district in the current school year.

For the first school year starting after the school year beginning with the effective date of the reorganization, base revenues are divided by the number of pupils in the previous school year who did not reside in territory that was detached to create the new school district, rather than by the number of pupils in the three previous school years. In addition, the revenue limit calculation is made using the average of the number of pupils in the current school year and the previous school year, instead of the average of the current and two preceding school years. For the second school year starting after the school year beginning with the effective date of reorganization, base revenues would be divided by the average of the number of

pupils in the previous two school years, rather than by the number of pupils in the three previous school years.

These methods of calculating revenue limits avoid using pupil counts from years prior to the reorganization, so that revenue limits are not affected by the larger pupil counts of these school districts before territory was detached.

Special Adjustment Aid -- Existing Districts. In general, special adjustment aid is provided to districts either to cushion the effect of reductions in general school aid from one year to the next, commonly referred to as a "hold harmless" payment, or as an incentive for school district consolidation. This aid ensures that a district's general school aid payment is no less than 85% of its prior year payment.

A separate provision applies to a district from which territory was detached to create a new school district. For the school year beginning on the first July 1 following the effective date of the reorganization, if the school district would receive less than 85% of the amount determined as follows, then its state aid is increased to 85% of the amount determined as follows: (a) divide the school district's membership in the preceding school year (the year the reorganization takes effect) by the school district's membership in the second preceding year (the year before the reorganization); and (b) multiply the amount of state aid received by the school district in the preceding school year by the quotient under (a). In this way, before calculating the 85% hold harmless, the prior year aid amount is adjusted to reflect the proportion of membership remaining in the district following reorganization.

100% Declining Enrollment Adjustment -- Existing Districts. In general, if a school district's three-year rolling average pupil enrollment was less than the prior year three-year rolling average, the district receives a one-year, nonrecurring adjustment to its revenue limit equal to 100% of

what the decline in enrollment would have generated. This declining enrollment adjustment under revenue limits does not apply to school districts from which territory was detached to create a new school district in the school year beginning with the effective date of the reorganization. For the first school year starting after the year beginning with the effective date of reorganization, the calculation of the 100% adjustment is modified to compare only the pupil count in the current year with the count in the previous year, rather than comparing three-year rolling averages. For the next year, the calculation is modified to compare only the average of the pupil count in the current and preceding school years with the average of the pupil count in the two previous years, rather than comparing three-year rolling averages. In this way, the declining enrollment calculation is not affected by the larger pupil counts of the affected districts prior to the reorganization.

In the year of the reorganization, the affected school districts would not be eligible for the adjustment, because the reorganization would reduce their enrollment, and as part of the reorganization the affected districts would have an opportunity to adjust their operations to reflect this reduced enrollment.

Debt Service. For both existing and new districts, funds needed for the payment of debt service of certain debt associated with reorganizations under these provisions are not subject to revenue limits. Funds needed for the payment of any general obligation debt service authorized by resolution of any school board and secured by the full faith and credit of the school district, if the issuance of the debt was not subject to a referendum under these provisions, is not subject to revenue limits. This includes debt service on the debt issued or reissued to fund or refund outstanding municipal obligations, interest on outstanding municipal obligations, or the payment of issuance costs or redemption premiums. Both the new school district and the school district from which territory was detached are permitted to issue bonds or

promissory notes for the purpose of financing any assets or liabilities apportioned to them under the reorganization. The school district's revenue limit is increased by the amount of the funds needed for the payment of the general obligation debt service on the amounts borrowed for this purpose.

Attachment and Detachment of Large Territory

A majority of the electors residing in a territory, or the owners of more than 50% of the territory as measured by assessed valuation, may file a written petition with the clerk of the school district in which the territory is located requesting the detachment of the territory from that school district and its attachment to an adjoining school district.

For the purpose of the transfer of large territory between school districts, a territory is defined as large if: (a) the assessed value of the territory proposed to be transferred divided by the assessment ratio of the taxation district is equal to or greater than 7% of the equalized valuation of the school district from which the territory would be detached; or (b) 7% or more of the enrollment of the district from which the territory would be detached resides in that territory.

Petitions for the detachment and attachment of any large territory must be filed with the clerk of the current school district in which the territory is located. The petition must include a sufficiently accurate description of the parcel proposed for transfer to determine its location in the district, as certified by the clerk of each city, town or village within which all or part of the territory is located, and the number of pupils residing in the territory and enrolled in the district, as certified by the school district clerk. The petition must state the number of pupils residing in the territory who, on the most recent third Friday in September or second Friday in January count, were enrolled in the district. Upon receipt of the petition, the district clerk must notify the school board of the district to

which the territory is proposed to be attached and the Secretary of the SDBAB.

The school boards of the affected territory, meeting jointly or separately in the first July beginning after receipt of the petition, may grant or deny the detachment and attachment of territory by adoption of a resolution. Each school board must file a copy of the resolution ordering or denying the reorganization with the SDBAB within five days after the adoption of the resolution. If both school boards agree to the attachment and detachment, then there is no referendum, and the territory is transferred effective on the July 1 following the school board approval. Failure of a school board to adopt a resolution either ordering or denying the transfer before August 1 constitutes a denial of the reorganization by that school board.

Regardless of whether the transfer is ordered or denied, a binding referendum is held if either of the following happens before the second Tuesday of the September following the school board decision: (a) either of the affected school boards directs a referendum be held; or (b) a petition requesting a referendum, signed by at least 10% of the electors residing in either affected district, is filed with the clerk of the school district from which the territory would be detached. If a referendum is necessary, it must be held on the Tuesday after the first Monday in November following the receipt of the petition or school board resolution. The transfer of the large territory must be approved by a majority of the votes cast in each affected school district in order to be approved, or the territory is not transferred.

Following the approval of a transfer of territory, assets and liabilities are assigned to the school districts according to statutory procedure, either proportionally, based on the ratio of equalized valuation of the territory to the detaching district, or according to an alternate agreement of the affected districts. The alternate agreement must pass by a three-fourths vote in each school board.

Any employee of the detaching district who is laid off as a result of the transfer has priority over other persons, except current and former employees of the attaching district, for three years after the effective date of the reorganization for positions in the attaching district.

Any person aggrieved by the transfer of large territory may appeal the school board's action to a circuit court within 30 days after the reorganization order is filed with the SDBAB.

Attachment and Detachment of Small Territory

Attachment and detachment of a small territory can be initiated by a written petition filed by the majority of the electors residing in a territory or the owners of more than 50% of the territory, or by a resolution adopted by the school boards of each of the affected districts.

For the purpose of the transfer of small territory between school districts, a territory is defined as small if: (a) the assessed value of the territory proposed to be transferred divided by the assessment ratio of the taxation district is less than 7% of the equalized valuation of the school district from which the territory would be detached; and (b) less than 7% of the enrollment of the district from which the territory would be detached resides in that territory.

In the case of a reorganization initiated by electors or owners, a majority of the electors residing in a territory, or the owners of more than 50% of the territory as measured by assessed valuation, must file a written petition with the clerk of the school district in which the territory is located requesting the detachment of the territory from that school district and its attachment to an adjoining school district. The petition must include a description of the territory and the number of pupils residing in the territory, as certified by the clerk of each city, town, or village within which the

territory is located. Upon receipt of the petition, the school district clerk must send a certified copy of the petition to the school board of the district to which the territory is proposed to be attached and to the Secretary of the SDBAB. In the first February beginning after receipt of the petition, the school boards of the affected districts may adopt resolutions ordering or denying the reorganization. Failure of a school board to adopt a resolution before March constitutes a denial of the reorganization. Before adopting a resolution, the school boards must give the electors and owners who signed the petition an opportunity to present their reasons for the proposed reorganization to the school board. The school district clerk of each affected school board must send a certified copy of the resolution to the school board of the other affected school district as well as to the Secretary of the SDBAB within five days after the resolution is adopted. If each school board adopts the resolution ordering the detachment and attachment, then the reorganization will take effect on the following July 1.

In the case of a reorganization initiated by the school boards of the two adjoining school districts, each school board must adopt a resolution ordering the detachment and reattachment. The resolutions adopted by the school districts must include a sufficiently accurate description of the parcel proposed for transfer to determine its location in the district and the number of pupils residing in the territory and enrolled in the district, as certified by the school district clerk. Prior to adopting the resolution, the school board of each affected school district must give the electors residing in the territory and the owners of the territory notice of the reorganization and an opportunity to present the school boards with reasons for or against the proposed reorganization. The school district clerk of each affected school board must send a certified copy of the resolution to the school board of the other affected school district as well as to the Secretary of the SDBAB within five days after the resolution is adopted. If each school board adopts the resolution ordering the detachment and

attachment, then the reorganization will take effect on the July 1 after the March 1 following the adoption of the resolutions.

A majority of the electors residing in the affected territory, or the owners of 50% or more of the parcel, may appeal the reorganization to an appeal panel by filing notice of appeal with the Secretary of the SDBAB by the March 15 following the adopting of the resolution. If an appeal is filed, the Secretary must send a copy of the notice of appeal to the school board of each affected school district.

In the case of a reorganization petition filed by electors or owners, if more than one appeal to detach territory from a single school district is filed by March 15 and any of the following applies, the SDBAB must review all of those appeals: (a) the total assessed valuation of the territory proposed to be detached under the appeals, divided by the assessment ratio of the taxation district, is equal to or greater than 7% of the equalized valuation of the school district from which the territory is proposed to be detached; or (b) the total number of pupils residing in the territory proposed to be detached under the appeals who were enrolled in the school district from which the territory is proposed to be detached is equal to or greater than 7% of that school district's enrollment. Additionally, the SDBAB must review an appeal if: (a) the sum of the assessed valuation of the territory proposed to be detached under the appeal divided by the assessment ratio of the taxation district, and the total assessed valuation of all territory detached from that school district in the two years preceding the date on which the petition was filed divided by the appropriate assessment ratios, is equal to or greater than 2% of the district's equalized valuation; or (b) the number of pupils residing in the territory proposed to be detached who are included in the enrollment of the school district from which territory is proposed to be detached in the two years preceding the filing of the petition constitutes 2% or more of the district's enrollment. If the

SDBAB is reviewing appeals, the Secretary of the Board must notify the school board of each affected school district and each owner or elector who signed the notice of appeal. In addition to considering the general criteria for school district reorganization in its decision, the SDBAB must consider the effect the reorganization would have on the school district from which the territory is proposed to be detached.

By the June 15 following the filing of the appeal, the appeal panel or the SDBAB must issue an order either affirming the school board's denial of the proposed reorganization or ordering all or any part of the territory described in the petition to be detached from the school district in which it is located and attached to the adjoining school district. The decision must be in writing and must include a statement of the reasons for the decision. If the appeal panel or the SDBAB approves the reorganization, the reorganization will take place on the following July 1.

As with a transfer of a large territory, assets and liabilities are assigned to the school districts according to statutory procedure, either proportionally, based on the ratio of equalized valuation of the territory to the detaching district, or according to an alternate agreement of the affected districts. The alternate agreement must pass by a three-fourths vote in each school board. Any employee of the detaching district who is laid off as a result of the transfer has priority over other persons, except current and former employees of the attaching district, for positions in the attaching district for three years after the effective date of the reorganization.

Any person aggrieved by the transfer of small territory may appeal the school board's action to a circuit court within 30 days after the reorganization order is filed with the SDBAB.

School District Dissolution

The dissolution of a school district may be

initiated by the adoption of a resolution by the affected school board stating it will consider dissolving the school district. The resolution must then be filed with the SDBAB and is subject to review by that board. For this type of review, the State Superintendent appoints seven members of the Board. The seven members include the State Superintendent or a designee, as well as two members each from school districts with small enrollments, districts with medium enrollments, and districts with large enrollments. The State Superintendent's designee can be the Deputy State Superintendent or an employee of DPI. Any action of the Board requires the affirmative vote of four of the seven members, and may be appealed to a circuit court.

In the July following the adoption of the resolution to dissolve, the school board may order the school district dissolved by adopting a resolution. Failure of a school board to adopt a resolution either ordering or denying the dissolution before August 1 constitutes denial of the dissolution. If the school board's order is approved by the SDBAB, the dissolution becomes effective the following July 1.

If a school board determines to dissolve, an advisory referendum on the dissolution must be held if: (a) at the time of adopting the resolution ordering the dissolution, the school board directs the holding of an advisory referendum; or (b) before the second Tuesday of September, a petition for an advisory referendum signed by at least 10% of the electors residing in the school district is filed with the district clerk. The school district clerk must file the results of the referendum with the Secretary of the SDBAB.

After the second Tuesday in September following the adoption of a resolution to dissolve, or after the advisory referendum, the SDBAB must review the dissolution and, before the following January 15, issue an order either affirming or denying the dissolution. If the SDBAB determines that the school district should dissolve, the SDBAB is

responsible for assigning the district's territory, assets, and liabilities to one or more other school districts.

Also, if dissolution is affirmed, the SDBAB must specify if the employees of the dissolving district become employees of the school district(s) to which territory is to be attached. Alternatively, the SDBAB can determine that any employee laid off as a result of district dissolution has priority over other persons, for a period of three years after the effective date of dissolution, for new or vacant positions for which they are qualified. Those laid off employees would not have priority, however, over laid off current or former employees of the school district(s) to which the territory is to be attached.

A school district may not dissolve if it has constructed a new school building within the preceding three years for which it still has outstanding debt. This limitation does not apply if: (a) the district to which the building is assigned agrees, by vote of its school board, to accept the building and the debt; or (b) prior to dissolution, the building is sold and the debt paid.

Recent Use of Dissolution Law. There have been three recent instances of school districts proposing to dissolve under the statutes governing school district dissolution. In 2005, the School Board of the Florence School District voted to dissolve the District. After that vote, in November, 2005, two referenda were approved by voters in the District. One was advisory and supported keeping the District open. The second approved nonrecurring increases under revenue limits for school district operations for five years. After conducting a number of hearings in conformance with the statutes, the seven members of the SDBAB involved in this matter voted unanimously in December, 2005, to reverse the School Board's order and to deny the dissolution, so that the Florence School District continues in operation.

In July, 2008, the School Board of the

Wausaukee School District voted to dissolve the District. After that vote, in August, 2008, a referendum was approved by voters to provide nonrecurring increases under revenue limits for school district operations for 10 years. At the end of September, 2008, the seven members of the SDBAB appointed to consider this issue voted unanimously to reverse the School Board's order to dissolve the District, so the Wausaukee School District did not dissolve.

In July, 2019, the School Board of the Palmyra-Eagle School District voted to dissolve the District. A petition for an advisory referendum signed by more than 10% of electors residing in the district was submitted. An advisory referendum was held in November, 2019, in which voters supported the dissolution. The seven members of the SDBAB met to discuss the proposed dissolution between November, 2019 and January, 2020. The SDBAB voted by a vote of 6-1 to reverse the School Board's order to dissolve the District, so the Palmyra-Eagle School District did not dissolve.

Attachment Upon Failure to Operate School

If a school district for two or more successive years has failed to operate sufficient classes at each grade level to accommodate all pupils residing in the district at the appropriate grade level, the SDBAB must attach the territory of the school district to one or more districts that do so. The school boards to which territory is attached must levy and collect a special tax against the property in the territory for the amount payable as tuition and transportation, at the time of attachment, by the detaching district.

Current law establishes an exception to the two-year limit on failing to operate sufficient classes for a newly created school district. If a school district has been created from the territory of one or more other districts, then, before the end of the first school year after the reorganization takes effect, the school board may request a one-year

extension. DPI may grant such an extension, and additional one-year renewals, if it determines that the board is making progress toward sufficient operation. If a newly created district fails to operate classes within the required time period, then the SDBAB must reattach the territory to each of the districts from which territory was detached.

If an order under these provisions is voided, the non-operating district must arrange for the attendance of its pupils at other school districts on a non-resident tuition basis, and must provide transportation for pupils residing two or more miles from the school they attend. If an order is voided, then the SDBAB must issue new orders of reorganization within the succeeding year.

Staff from DPI indicate that this provision has not been invoked in recent decades.

Recent Reorganization Decisions

In 2022-23, 17 reorganization proposals were considered by school boards. Of those, 15 were initially denied by school boards and two were approved. Of those denied by school boards, six were appealed to the SDBAB and two decisions were reversed. Four reorganizations were completed, all of which transferred small territories (from Edgar to Marathon City, from Marathon City to Edgar, from West Allis-West Milwaukee to New Berlin, and from Verona Area to Madison Metropolitan). Appendix I shows a list prepared by DPI of the reorganization petitions for 2022-23.

In 2023-24, school boards considered 31 reorganization petitions. Of those, two were approved, 27 were denied, and no action was taken for the remaining two. Of those denied by school boards, 12 were appealed to the SDBAB, one decision was reversed, and another one was appealed to the circuit court. In total, three reorganizations were completed (from Omro to Oshkosh Area, from Iowa-Grant to Mineral Point, and from Norris to Washington-Caldwell and Waterford UHS). Appendix II shows the reorganization petitions considered in

2023-24.

Criteria for School District Reorganizations

The statutes list a number of criteria by which school boards and the SDBAB must evaluate school district dissolution or reorganization requests. The effect of the reorganization is assessed for the educational welfare of all the children residing in all of the affected school districts. The following items must be considered:

(a) geographical and topographical characteristics of the affected school districts, including the estimated travel time to and from school for pupils in the school districts;

(b) the educational needs of students, the educational programs currently offered by each affected school district, and the ability and commitment of each school district to meet those needs and continue to offer those educational programs;

(c) if territory is proposed to be detached from one school district and attached to an adjoining school district, whether the proposed detachment will have any adverse effect on the program currently offered by the school district from which the territory is proposed to be detached, including both curricular and extracurricular aspects of that program;

(d) the testimony of and written statements filed by the residents of the affected school districts;

(e) the estimated fiscal effect of the proposed reorganization on the affected school districts, including the effect of the apportionment of assets and liabilities;

(f) whether the proposed reorganization will make any part of a school district's territory noncontiguous;

(g) the socioeconomic level and racial

composition of the pupils who reside or will reside in territory proposed to be detached from one school district and attached to an adjoining school district or to be affected by school district creation, consolidation, or in a school district proposed to be dissolved;

(h) the proportion of the pupils who reside in such territory who are children at risk;

(i) the effect that the pupils affected by a

reorganization will have on the present and future socioeconomic level and racial composition of the affected school districts and on the proportion of the affected school districts' enrollments that will be children at risk;

(j) the results of any referendum relating to dissolution; and

(k) other appropriate factors may be considered.

APPENDIX I

2022-23 Reorganization Petitions

Detaching District	Attaching District	School District Action	SDBAB Decision	Appealed to Circuit Court
Kettle Moraine	Waukesha	Denial		
Waukesha	Elmbrook	Denial	Affirmed
